

# Eaton 5P Lithium-ion rackmount UPS

Delivering business continuity and advanced management for edge computing environments

Progression in battery technology and remote management come together to make the 5P Lithium-ion rackmount UPS a necessity for edge computing environments. The lithium-ion UPS' "set it and forget it" value proposition allows IT managers to easily deploy the 5P without the maintenance and refresh challenges of a UPS utilizing lead-acid batteries.

Building on the success of the 5P UPS platform, Eaton has reduced the weight, improved battery life and lengthened our warranty. These added benefits, in combination with the extended life of the product, provide IT managers with the opportunity to align their UPS refresh cycles with the rest of the IT stack, saving time and money spent on labor and replacement batteries.

Eaton's 5P Lithium-ion battery pack with on-board battery management — increases cycle life in higher temperature environments.
